**Occurrence:** An oxidation product of lower valent vanadium minerals, on fracture surfaces and replacing fossil wood in Colorado Plateau-type U–V deposits; likely widely distributed.

**Association:** Selenium, metatyuyamunite, melanovanadite (Colorado Plateau, USA); pascoite, pyrite, copper, gypsum, patrónite, melanovanadite (Minasragra, Peru).

**Distribution:** In the USA, in Colorado, from the Peanut and Jo Dandy mines, Bull Canyon district, Uravan district, Montrose Co., at the Fall Creek mine, Placerville, San Miguel Co., and the Matchless mine, Calamity Mesa, Mesa Co.; on Wilson Mesa, Grand Co., Utah; in the Shadyside mine, east Carrizo Mountains, San Juan Co., New Mexico; and in the Joleo mine, Apache Co., Arizona. From Minasragra, 46 km from Cerro de Pasco, Peru.
